Subject index*

A

Adenosine and ATP, effects of, on AV conduction and AV junctional rhythm, 96
Adipose tissue, rat and human, phosphodiesterase activity of, 598
Age and achievement, 689
Albumin, effect of, upon loss of enzymes from washed platelets, 240
  infusion, effect of upon norepinephrine concentration in nephrotic children, 516
Aldosterone, cortisol, corticosterone, simultaneous measurement of, in human peripheral plasma by displacement analysis, 848
Alkaline phosphatase, leukocyte, isoenzymes, zinc and magnesium content of, 228
Ammoniagenesis, gluconeogenesis, citrate metabolism in renal cortex in vitro, interrelationships between, 505
AMP, dibutyryl cyclic, effects of thyrotropin and prostaglandin E1, 258
Analgesic effect of methadone in rats, influence of phenobarbital on metabolism and, 439
Anemia, hemolytic, characterization of two new variants of glucose-phosphate-isomerase deficiency with hereditary nonspherocytic, 942
  iron-deficiency, erythrocyte composition in, 559
Angiotensinase, plasma, activity by radioimmunoassay method, measurement of, 170
Antigen common to human and bacterial cells. II. *E. coli* 014, the common enterobacteriaceae antigen. Blood groups A and B and *E. coli* 086, 38
  E. coli 014, common enterobacteriaceae, blood groups A and B and *E. coli* 086, antigens common to human and bacterial cells, 38
  farmer's lung, double dialysis method of producing, 683
Antisera, rapid method to obtain, C1 esterase from various species, 326
Antiserum, specific, studies on plasma thromboplastin antecedent (factor XI), PTA deficiency, PTA inhibition by plasma, pharmacologic inhibitors and specific antiserum, 113
Arvin, effects of, on blood platelets, in vitro and in vivo studies, 758
Asthma, bronchial, patterns of response to bronchodilators in patients with, 267
ATP, effects of adenosine and, on AV conduction and AV junctional rhythm, 96
AV conduction and AV junctional rhythm, effects of adenosine and ATP on, 96
  junctional rhythm and AV conduction, effects of adenosine and ATP on, 96

B

Bacterial cells, antigens common to human and. II. *E. coli* 014, the common enterobacteriaceae antigen. Blood groups A and B and *E. coli* 086, 38
Balloon-occludable t-tube for cholangiography and quantitative collection and reinfusion of bile in man, 500
Bile duct obstruction, chronic, effect of, on renal handling of calcium and magnesium, 794
  in man, balloon-occludable t-tube for cholangiography and quantitative collection and reinfusion of, 500
Bilirubin production as a measure of red cell life span, 364
Biopsy needle, muscle, for percutaneous excision of large specimens, 679
Blood, bank, preservation of opsonic activity against *Staphylococcus aureus* and *Escherichia coli* in, 886
  flow, altered, during regional pulmonary histamine infusion in dogs, 413

*January, pp. 1-180; February, pp. 181-352, March, pp. 353-504; April, pp. 505-688; May, pp. 689-872; June, pp. 873-1068.

Blood—Cont'd
coronary sinus, by dye dilution technique in man, measurement of, 75
human, coagulation elicited by thrombin, inhibitor of, 924
platelets, effects of arvin on, in vitro and in vivo studies, 758
preservation of, for transfusion, IX, the effect of increased pH and addition of inosine only, or adenine and inosine on the red cell function, 863
simple method for measuring oxygen content in, 1035
Body calcium, total, (bone mass), absolute measurement of, in vivo, 430
composition by neutron activation analysis in patient with renal failure, determination of, 978
Bone disease during regular hemodialysis, effects of dialysate calcium and fluoride on, 204
Bone marrow colony-stimulating factor in human urine, standardized bioassay for, levels in normal man, 657
dog, growth of leukocyte colonies in vitro from, 1041
ferrochelatase activity in dogs, chloramphenicol-induced erythroid suppression, 137
Bovine calcitonin, radioimmunoassay for, 480
Brain tissue osmolality, method of determination and variations in hyper- and hypo-osmolar states, 334
Bronchial asthma, patterns of response to bronchodilators in patients with, 267
Bronchodilators in patients with bronchial asthma, patterns of response to, 267

C

Calcitonin, bovine, radioimmunoassay for, 480
Calcium absorption, intestinal, concurrent use of oral and intravenous tracers and calculation by the inverse convolution method, 570
dialysate, and fluoride, effects of, on bone disease during regular hemodialysis, 204
magnesium, effect of chronic bile duct obstruction on renal handling of, 794
total body, (bone mass), absolute measurement of, in vivo, 430
Canine mucosal barrier, effect of several ulcerogenic drugs on, 302
Carbohydrate tolerance studies with 3-day-old infants, 31
Carbon monoxide production in normal human beings, variation in rate of endogenous, 85
Catabolism, demonstration of multiple pathways of, fibrinogen turnover, 710
Cells, microtechnique for chromosome analysis of small numbers of, 845
Cellulose acetate membranes, use of reinforced (mylar-backed), for quantitative radial immunodiffusion, 673
Children, nephrotic effect of albumin infusion upon plasma norepinephrine concentration in, 516
Cholangiography and quantitative collection and reinfusion of bile in man, balloon-occludable t-tube for, 500
Chloramphenicol-induced erythroid suppression and bone marrow ferrochelatase activity in dogs, 137
Chlorothiazide, furosemide, differences in the effect of, on the distribution of renal cortical blood flow in dog, 995
effect of, on the thoracic duct lymph flow in the dog, 693
Cholera enterotoxin, parenteral, in dogs, systemic effect of, 145
Cholesterol synthesis in rat, effect of plasmapheresis on, relationship to protein synthesis, 801
Chromosome analysis of small numbers of cells, microtechnique for, 845
Citrate metabolism, ammoniagenesis, and gluconeogenesis in renal cortex in vitro, interrelationships between, 505
Coagulation and lipoprotein metabolism, identification effects on, crystalline IgG protein in multiple myeloma, 731
assays, use of heparinase to eliminate heparin inhibition in routine, 1027
factors VII and IX in perfused spleens, independent stimulations regulating the production of, 770
Collagen biosynthesis in rheumatoid synovial tissue, 960
Colon, intra-abdominal, microflora of the human ileum and, results of direct needle aspiration at surgery and evaluation of the technique, 421
Colony-forming units, rat hematopoietic, extended recovery lag in, following sub-lethal x-irradiation, 550
-stimulating factor, bone marrow, in human urine, standardized bioassay for, levels in normal man, 657
Complement in synovial fluid, effect of intra-articular hydrocortisone on, 62
Connective tissue activation, observations on the mechanism of action of connective tissue activating peptide, 285
Coronary sinus blood flow by dye dilution technique in man, measurement of, 75
Corticosterone, aldosterone, cortisol, simultaneous measurement of, in human peripheral plasma by displacement analysis, 848

Cortisol, aldosterone, corticosterone, simultaneous measurement of, in human peripheral plasma by displacement analysis, 848
Coxsackie virus infection in neonatal mice, stimulation of small intestinal mucosal enzymes during, 814

D

Diabetes, effect of, on intestinal disaccharide activities, 579
Dialysate calcium and fluoride, effects of, on bone disease during regular hemodialysis, 204
Dialysis method, double, of producing farmer's lung antigens, 683
thin-layer microtubular continuous-flow countercurrent, 648
Dibutyryl cyclic AMP, effects of thyrotropin and prostaglandin E1, 258
Disaccharide activities, intestinal, effect of diabetes on, 579
in rat, effects of glucose, sucrose, lactose on intestinal, 19
Disc-diffusion test, efficacy of standard, as applied to susceptibility of *Staphylococcus aureus* to tetracycline and minocycline, 316
Displacement analysis, simultaneous measurement of aldosterone, cortisol, corticosterone in human peripheral plasma by, 848
Dogs, altered blood flow during regional pulmonary histamine infusion in, 413
bone marrow, growth of leukocyte colonies in vitro from, 1041
chloramphenicol-induced erythroid suppression and bone marrow ferrochelatase activity in, 137
differences in effect of furosemide and chlorothiazide on distribution of renal cortical blood flow in, 995
effect of furosemide and chlorothiazide on thoracic duct lymph flow in, 693
systemic effect of parenteral cholera enterotoxin in, 145
Dollar benefits of biomedical research, a cost analysis, 353
Dye dilution technique in man, measurement of coronary sinus blood flow, 75

E

Editors, letter from, 1
Endotoxin plasma on in vitro granulopoiesis, effect of, 1014
Energy metabolism, effect of inhibitors of, on erythropoietin production, 388
Enterobacteriaceae antigen. Blood groups A and B and *E. coli* 086, *E. coli* 014, common, antigens common to human and bacterial cells, 38
Enzyme deficiency, abnormal mobility, and absence of hemolysis, glucose-6-phosphate dehydrogenase Mexico, a new variant with, 788
Enzyme—Cont'd
from washed platelets, effect of albumin upon loss of, 240
procoagulant, purified, from the venom of the eastern diamondback rattlesnake (Crotalus adamanteus, in vivo and in vitro studies, 906
small intestinal mucosal, during Coxsackie virus infection in neonatal mice, stimulation of, 814
Erythrocyte composition in iron-deficiency anemia, 559
neutral inorganic pyrophosphatase in pseudogout, 277
organic phosphate levels and active potassium flux to hyperbaric hyperoxia, response of, 541
Erythroid suppression, chloramphenicol-induced, and bone marrow ferrochelatase activity in dogs, 137
Erythromycin preparations in man, experimental bases for different hepatotoxicity of, 832
Erythropoiesis, effect of phenobarbital on testosterone-induced, 187
splenic, studies in mouse, ribosomal ribonucleic acid metabolism, 526
Erythropoietin production, effect of inhibitors of energy metabolism on, 388
production in nephrectomized rats, possible role of the renal erythropoietic factor, 950
renal and extrarenal production in male and female rats of various ages, 181
Escherichia coli and *Staphylococcus aureus* in bank blood, preservation of opsonic activity against, 886
014, common enterobacteriaceae antigen. Blood groups A and B and *E. coli* 086, antigens common to human and bacterial cells, 38
086, antigens common to human and bacterial cells, *E. coli* 014, common enterobacteriaceae antigen, blood groups A and B, 38
septicemia, lethal, in baboon, alpha-adrenergic inhibition of insulin secretion and its relationship to the duration of survival, 622
Esterase, C1, from various species, rapid method to obtain, 326

F

Factor XI, PTA deficiency, PTA inhibition by plasma, pharmacologic inhibitors and specific antiserum, plasma thromboplastin antecedent, studies on, 113
Factor XIa, plasma inhibition of activated plasma thromboplastin antecedent in pregnancy, 106
Factor XII (Hageman factor), in vivo role of, in hypercoagulability and fibrinolysis, 388
Farmer's lung antigens, double dialysis method of producing, 683

Fat absorption on absorption of alpha-tocopherol in rat, effect of therapeutic measures which alter, 824
Ferrochelatase activity in dogs, chloramphenicol-induced erythroid suppression and bone marrow, 137
Fibrinogen turnover, demonstration of multiple pathways of catabolism, 710
in rats as a function of age, 724
Fibrinolysis, in vivo role of factor XII (Hageman factor) in hypercoagulability and, 388
Fibrinolytic activity, cortical, in normal and diseased human kidneys, 701
Fistula, t-tube, side, in thoracic duct, a surgical technique for the study of lymph and lymphocytes in rat under normal conditions of thoracic duct circulation, 157
Fluoride, dialysate calcium, effects of, on bone disease during regular hemodialysis, 204
effect of inorganic on renal concentrating mechanism, possible nephrotoxicity in man, 192
alpha-L-Fucosidase, fucosidosis, diagnosis by serum assay of, 164
Fucosidosis, diagnosis by serum assay of alpha-L-fucosidase, 164
Furosemide and chlorothiazide, differences in effect of, on the distribution of renal cortical blood flow in dog, 995
effect of, on the thoracic duct lymph flow in the dog, 693

G

Gluconeogenesis, citrate metabolism, ammoniagenesis, in renal cortex in vitro, interrelationships between, 505
Glucose-6-phosphate dehydrogenase Mexico, a new variant with enzyme deficiency, abnormal mobility, and absence of hemolysis, 788
-phosphate-isomerase deficiency with hereditary nonspherocytic hemolytic anemia, characterization of two new variants of, 942
sucrose, lactose on intestinal disaccharides in rat, effects of, 19
Glycoprotein, serum, alterations in malaria, characterization and pathophysiology, 55
Granulopoiesis, effect of endotoxin plasma on in vitro, 1014
Granulopoietic stem cell regulators in murine urine, alterations in activity after methotrexate, 379
Guinea pig, acute experimental hypersensitivity pneumonitis in, 745

H

Hageman factor, in vivo role of factor XII, in hypercoagulability and fibrinolysis, 388
Hamster, Chinese, progesterone-induced alterations of oogenesis in, 972
Hemodialysis, effects of dialysate calcium and fluoride on bone disease during regular, 204
Hemolysis, glucose-6-phosphate dehydrogenase Mexico, a new variant with, 788
Hemopexin metabolism in the rabbit, 935
Heparin inhibition in routine coagulation assays, use of heparinase to eliminate, 1027
Heparinase, use of, to eliminate heparin inhibition in routine coagulation assays, 1027
Hepatotoxicity of erythromycin preparations in man, experimental bases for different, 832
Histamine infusion, pulmonary, in dogs, altered blood flow during regional, 413
Human and bacterial cells, antigens common to. II. E. coli 014, the common Enterobacteriaceae antigen, blood groups A and B and E. coli 086, 38
ileum and intra-abdominal colon, microflora of the, results of direct needle aspiration at surgery and evaluation of the technique, 421
pregnancy urine, purification of trypsin inhibitor from, 491
sputum from patients with chronic obstructive lung disease, L(+)-lactate dehydrogenase in, 461
variation in rate of endogenous carbon monoxide production in, 85
Hydrocortisone, intra-articular effect of, on complement in synovial fluid, 62
Hypercoagulability and fibrinolysis, in vivo role of factor XII (Hageman factor) in, 388
Hyperlipoproteinemia, primary, plasma phospholipids in different types of, 611
Hyper-osmolar and hypo-osmolar states, brain tissue osmolality, method of determination and variations in, 334
Hyperoxia, hypobaric, response of erythrocyte organic phosphate levels and active potassium flux to, 541
Hypo-osmolar, hyper-osmolar states, brain tissue osmolality method of determination and variations in, 334

I

IgG protein, crystalline, in multiple myeloma, identification effects on coagulation and lipoprotein metabolism, 731
Ileum, human, and intra-abdominal colon, microflora of, results of direct needle aspiration at surgery and evaluation of the technique, 421
Immunity in pseudomonas disease, type-specific, 47

Immunoadsorption, solid phase technique, increased jejunal immunoglobulin synthesis in patients with nontropical sprue as measured by a, 1004
Immunodiffusion, single, radial, microquantitation of thrombosthenin in human platelets by, 344
use of reinforced (mylar-backed), cellulose acetate membranes for, quantitative radial, 673
Immunoglobulin, jejunal, synthesis in patients with nontropical sprue as measured by a solid phase immunoadsorption technique, increased, 1004
Infants, carbohydrate tolerance studies with 3-day-old, 31
Infusion, pulmonary histamine, in dogs, altered blood flow during regional, 413
Insulin, radioiodinated, during storage, factors affecting the stability of, 470
secretion, alpha-adrenergic inhibition of, and relationship to survival, lethal *Escherichia coli* in baboon, 622
Intestinal epithelial cell during vitamin B_{12} absorption, evidence for absorption of immunoreactive intrinsic factor into, 587
Intra-abdominal colon, microflora of the, human ileum and, results of direct needle aspiration at surgery and evaluation of the technique, 421
Intrinsic factor, immunoreactive, evidence for absorption of, into intestinal epithelial cells during vitamin B_{12} absorption, 587
Iron-deficiency anemia, erythrocyte composition in, 559
influence of, on tissue content and toxicity of ingested lead in rat, 128
Isoenzymes, leukocyte alkaline phosphatase, zinc and magnesium content of, 228

J

Jejunal immunoglobulin synthesis in patients with nontropical sprue as measured by a solid phase immunoadsorption, increased, 1004

K

Kidneys, cortical fibrinolytic activity in normal and diseased human, 701

L

L(+)-Lactate dehydrogenase in human sputum from patients with chronic obstructive lung disease, 461
Lactose, sucrose, glucose on intestinal disaccharides in rat, effects of, 19
Lead, ingested, in rat, influence of iron deficiency on tissue content and toxicity, 128
Leukocyte alkaline phosphatase isoenzymes, zinc and magnesium content of, 228
colonies, growth of, in vitro from dog bone marrow, 1041
cultured, development of procoagulant (tissue thromboplastin) activity in, 778
Leukotaxis in a child with recurrent infections, serum inhibitor of, 878
insubstantial, 873
Lipoprotein metabolism, identification effects on coagulation and, crystalline IgG protein in multiple myeloma, 731
Lithocholic acid, red cell membranes in vivo, effect of, 7
Lung disease, chronic obstructive, L(+)-lactate dehydrogenase in, 461
Lymph and lymphocytes in rat under normal conditions of thoracic duct circulation, t-tube, side fistula in thoracic duct, surgical technique for study of, 157
Lymphocytes in rat under normal conditions of thoracic duct circulation, t-tube side fistula in thoracic duct, lymph and, surgical technique for study of, 157

M

Macroreticulocyte membranes in vivo, maturation of, 215
Magnesium, calcium, effect of chronic bile duct obstruction on renal handling of, 794
zinc, content of leukocyte alkaline phosphatase isoenzymes, 228
Malaria, characterization and pathophysiology of serum glycoprotein alteration in, 55
Man, bile in, balloon-occludable t-tube for cholangiography and quantitative collection and reinfusion of, 500
effect of inorganic fluoride on renal concentrating mechanism, possible nephrotoxicity in, 192
influence of acute tissue injury on zinc metabolism in, 452
measurement of coronary sinus blood flow by dye dilution technique, 75
Megakaryocyte kinetics following thermal injury, platelet and, 247
Metabolism and analgesic effect of methadone in rats, influence of phenobarbital on, 439
lipoprotein, identification effects on coagulation and, crystalline IgG protein in multiple myeloma, 731
ribosomal ribonucleic acid, studies on splenic erythropoiesis in mouse, 526
zinc, in man, influence of acute tissue injury on, 452
Methadone, influence of phenobarbital on metabolism and analgesic effect of, in rats, 439

Methotrexate, alterations in activity after, granulopoietic stem cell regulators in murine urine, 379
Mice, neonatal stimulation of small intestinal mucosal enzymes during Coxsackie virus infection in, 814
Microflora of human ileum and intra-abdominal colon, results of direct needle aspiration at surgery and evaluation of the technique, 421
Minocycline, tetracyline, efficacy of standard disc-diffusion test as applied to susceptibility of *Staphylococcus aureus* to, 316
Minoxidil in normotensive, rats, tissue distribution and hypotensive effects of, 639
Mouse, intravenous, long-term infusion in unrestrained, 669
studies on splenic erythropoiesis in, ribosomal ribonucleic acid metabolism, 526
Mucosal barrier, canine, effect of several ulcerogenic drugs on, 302
Murine urine, granulopoietic stem cell regulators in, alterations in activity after methotrexate, 379
Muscle biopsy needle for percutaneous excision of large specimens, 679
Myeloma, multiple, crystalline IgG protein in, identification effects on coagulation and lipoprotein metabolism, 731

N

Nephrotoxicity in man, possible, effect of inorganic fluoride on renal concentrating mechanism, 192
Neutron activation analysis in patient with renal failure, determination of body composition by, 978
Norepinephrine, plasma, effect of albumin infusion upon concentration in nephrotic children, 516

O

Oogenesis in the Chinese hamster, progesterone-induced alterations of, 972
Opsonic activity against *Staphylococcus aureus* and *Escherichia coli* in bank blood, preservation of, 886
Osmolality, brain tissue, method of determination and variations in hyper- and hypo-osmolar states, 334
Oxygen content in blood, a simple method for measuring, 1035

P

Pathophysiology of serum glycoprotein alterations in malaria, characterization, 55
Peptide, observations on the mechanism of action of connective tissue activating, connective tissue activation, 285
Phenobarbital, effect of, on testosterone-induced erythropoiesis, 187
influence of, on metabolism and analgesic effect of methadone in rats, 439
Phosphatase, leukocyte alkaline, isoenzymes zinc and magnesium content, 228
Phosphodiesterase activity of rat and human adipose tissue, 598
Phospholipids, plasma, in different types of hyperlipoproteinemia, 611
5-Phosphoribosyl-1-pyrophosphate in red blood cells, simpler method for the determination of, 1021
Plasma angiotensinase activity by radioimmunoassay method, measurement of, 170
endotoxin, on in vitro granulopoiesis, effect of, 1014
inhibition of activated plasma thromboplastin antecedent (factor XIa) in pregnancy, 106
peripheral human, simultaneous measurement of aldosterone, cortisol, corticosterone, by displacement analysis, 848
thromboplastin antecedent (factor XIa) in pregnancy, plasma inhibition of activated, 106
PTA deficiency, PTA inhibition by plasma, pharmacologic inhibitors and specific antiserum, studies on, 113
Plasmapheresis, effect of, on cholesterol synthesis in rat, relationship to protein synthesis, 801
Platelets, human, microquantitation of, thrombosthenin in, by single radial immunodiffusion, 344
megakaryocyte kinetics following thermal injury, 247
washed, effect of albumin upon loss of enzymes from, 240
Pneumonitis in the guinea pig, acute experimental hypersensitivity, 745
Potassium flux, response of erythrocyte organic phosphate levels and, to hypobaric hyperoxia, 541
Pregnancy, plasma inhibition of activated plasma thromboplastin antecedent (factor XIa) in, 106
Procoagulant (tissue thromboplastin) activity in cultured leukocytes, development of, 778
Progesterone-induced alterations of oogenesis in the Chinese hamster, 972
Prostaglandin E1, thyrotropin, and dibutyryl cyclic AMP, effects of, 258
Protein synthesis, effect of plasmapheresis on cholesterol synthesis in rat, relationship to, 801
Pseudogout, erythrocyte neutral inorganic pyrophosphatase in, 277
Pseudomonas disease, type-specific immunity in, 47
PTA deficiency and PTA inhibition by plasma, pharmacologic inhibitors and specific antiserum, plasma thromboplastin antecedent (factor XI), studies on, 113

Pulmonary histamine infusion in dogs, altered blood flow during regional, 413
Pyrophosphatase, erythrocyte neutral inorganic, in pseudogout, 277

R

Rabbit, hemopexin metabolism in the, 935
Radial immunodiffusion, microquantitation of thrombosthenin in human platelets by single, 344
Radioimmunoassay for bovine calcitonin, 480
method, measurement of plasma angiotensinase activity by, 170
Radioiodinated insulin during storage, factors affecting the stability of, 470
Rat, effects of glucose, sucrose, lactose on intestinal disaccharides, 19
plasmapheresis on cholesterol synthesis in, relationship to protein synthesis, 801
therapeutic measures which alter fat absorption on the absorption of alpha-tocopherol in, 824
fibrinogen turnover, as a function of age, 724
hematopoietic colony-forming units following sub-lethal x-irradiation, extended recovery lag in, 550
influence of iron deficiency on tissue content, 128
phenobarbital on metabolism and analgesic effect of methadone, 439
male and female, of various ages, renal and extrarenal erythropoietin production in, 181
nephrectomized, erythropoietin production in, possible role of the renal erythropoietic factor, 950
tissue distribution and hypotensive effects of minoxidil in normotensive, 639
t-tube side fistula in thoracic duct, surgical technique for study of lymph and lymphocytes under normal conditions of thoracic duct circulation, 157
Rattlesnake, eastern diamondback *(Crotalus adamanteus)*, purified procoagulant enzyme from the venom of, in vivo and in vitro studies, 906
Red blood cells, simpler method for determination of 5-phosphoribosyl-1-pyrophosphate in, 1021
Red cell life span, bilirubin production as a measure of, 364
membranes in vivo, effect of lithocholic acid on, 7
Regulators, granulopoietic stem cell, in murine urine, alterations in activity after methotrexate, 379
Renal cortex in vitro, interrelationships between citrate metabolism, ammoniagenesis, and gluconeogenesis, 505
Renal—Cont'd
cortical blood flow in dog, differences in effect of furosemide and chlorothiazide on the distribution of, 995
and extrarenal erythropoietin production in male and female rats of various ages, 181
failure, determination of body composition by neutron activation analysis in patient with, 978
Ribonucleic acid metabolism, ribosomal studies on splenic erythropoiesis in mouse, 526

S

Septicemia, lethal *Escherichia coli*, in baboon, alpha-adrenergic inhibition of insulin secretion and its relationship to the duration of survival, 622
Serum assay of alpha-L-fucosidase, fucosidosis, diagnosis by, 164
Serum glycoprotein alterations in malaria, characterization and pathophysiology, 55
Sinus blood flow, coronary, by dye dilution technique in man, measurement of, 75
Spleens, perfused, independent stimulators regulating the production of coagulation factors VIII and IX in, 770
Sprue, nontropical, as measured by a solid phase immunoadsorption technique, increased jejunal immunoglobulin synthesis in patients with, 1004
Sputum, human from patients with chronic obstructive lung disease, L(+)-lactate dehydrogenase in, 461
Staphylococcus aureus and *Escherichia coli* in bank blood, preservation of opsonic activity against, 886
susceptibility of, to tetracycline and minocycline, efficacy of standard disc-diffusion test as applied to, 316
Sucrose, glucose, lactose on intestinal disaccharides in rat, effects of, 19
Synovial fluid, effect of intra-articular hydrocortisone on complement in, 62
tissue, collagen biosynthesis in rheumatoid, 960

T

Testosterone-induced erythropoiesis, effect of phenobarbital on, 187
Tetracycline, minocycline, efficacy of standard disc-diffusion test as applied to susceptibility of *Staphylococcus aureus* to, 316
Thermal injury, platelet and megakaryocyte kinetics following, 247

Thin-layer microtubular continuous-flow countercurrent dialysis, 648
Thoracic duct lymph flow, effect of furosemide and chlorothiazide on, 693
t-tube, side, fistula in, a surgical technique for study of lymph and lymphocytes in rat under normal conditions of thoracic duct circulation, 157
Thrombin, inhibitor of human blood coagulation elicited by, 924
Thromboplastin antecedent, plasma factor XI, PTA deficiency, PTA inhibition by plasma, pharmacologic inhibitors and specific antiserum, studies on, 113
plasma activated, antecedent (factor XIa) in pregnancy, plasma inhibition of activated, 106
Thrombosthenin, microquantitation of, in human platelets by single radial immunodiffusion, 344
Thyrotropin, prostaglandin E1, and dibutyrl cyclic AMP, effects of, 258
Tissue content and toxicity of ingested lead in the rat, influence of iron deficiency on, 128
distribution and hypotensive effects of minoxidil in normotensive rats, 639
injury, acute, influence of, on zinc metabolism in man, 452
alpha-Tocopherol in rat, effect of therapeutic measures which alter fat absorption, 824
Transfusion, preservation of blood for, IX, the effect of increased pH and addition of inosine only, or adenine and inosine on the red cell function, 863
Trypsin inhibitor from human pregnancy urine, purification of, 491
T-tube, balloon-occludable, for cholangiography and quantitative collection and reinfusion of bile in man, 500
side fistula in thoracic duct: A surgical technique for the study of lymph and lymphocytes in rat under normal conditions, 157

U

Ulcerogenic drugs, effect of several, on canine mucosal barrier, 302
Urine, human pregnancy, purification of trypsin inhibitor from, 491
standardized bioassay for bone marrow colony-stimulating factor in, levels in normal man, 657
murine, granulopoietic stem cell regulators in, alterations in activity after methotrexate, 379

V

Venom of the eastern diamondback rattlesnake, purified procoagulant enzyme from, in vivo and in vitro studies, 906
Vitamin B_{12} absorption, evidence for absorption of immunoreactive intrinsic factor into intestinal epithelial cell during, 587

X

X-irradiation, sub-lethal, extended recovery lag in rat hematopoietic colony-forming units following, 550

Z

Zinc and magnesium content of leukocyte alkaline phosphatase isoenzymes, 228
metabolism in man, influence of acute tissue injury on, 452

Subject index*

A

Adenosine 3′,5′ monophosphate (cyclic AMP) in asthmatics, decreased, urinary, 772

Addicts, heroin, γ-globulin binding of morphine in, 155

ADP as a cause of reversible inhibition of platelet retention in glass-bead columns, 603

Adrenal gland, human, tyrosine hydroxylase activity in neuroblastoma and, 190

Alanine and pyruvate in plasma and tissues, a microfluorometric enzymatic assay for determination of, 434

Aldosterone, effect of, on erythropoietin production and erythropoiesis, 217

Animals, small, measurement of glomerular filtration rate in, without urine collection, 845

Antigen, segregated, in cartilage matrix, 364

Antihemophilic factor (AHF, factor VIII), immunologic studies of, 822

changes in (AHF, factor VII) procoagulant activity, and AHF-like antigen in normal pregnancy following exercise and pneumoencephalography, 256

changes in (AHF, factor VII) procoagulant activity, and AHF-like antigen in normal pregnancy following exercise and pneumoencephalography, 256

Anti-M-typing streptococcal sera, an absorption method for preparing, using acid-hydrolyzed cells, 834

alpha-1-Antitrypsin, inhibition of leukocytic elastase from purulent sputum by, 88

serum, method for quantitation of, tryptic inhibition of the vitamin B_{12} uptake by ileal homogenate, 102

Aortic valve replacement, plasma hemopexin levels following, valuable screening test for assessing the severity of cardiac hemolysis, 112

Aplasia, medullary, experimental, 8

Apparatus, inexpensive, for making precise continuous complex gradients for column chromatography, 839

Assay, radioimmune, simplified and sensitive detection of subtypes of Australia antigen (HB Ag) using a solid-phase, 291

Asthmatics, decreased urinary adenosine 3′,5′ monophosphate (cyclic AMP) in, 772

Atomic absorption, flameless, microdetermination of blood lead in children by, carbon rod atomizer, 567

Atomizer, carbon rod, microdetermination of blood lead in children by flameless atomic absorption, 567

ATPase, brain sodium-potassium, in uremic rats, inhibition of, 71

Australia antigen (HB Ag) using a solid-phase radioimmune assay, simplified and sensitive detection of subtypes of, 291

B

Bicarbonate, role of, in determining pH heterogeneity in rat diaphragm, 679

Bilirubin potential, free, in jaundiced newborn infants' sera, guide to prevention of kernicterus, sephadex G-25 quantitative estimation of, 455

Blood cells, human, semiquantitative evaluation of tartrate-resistant acid phosphatase activity in, 711

lead in children, microdetermination of, by flameless atomic absorption, carbon rod atomizer, 567

whole, phagocytic and bactericidal activity for *Staphylococcus aureus*, 857

Bradykinin, kinetics of release of, by kallikrein in normal human plasma, 496

Brain sodium-potassium ATPase in uremic rats, inhibition of, 71

Business executives, middle-aged, exercise response of smoking and non-smoking in, 79

*July, pp. 1-154; August, pp. 155-312; September, pp. 313-462; October, pp. 463-612; November, pp. 613-754; December, pp. 755-886.

C

Calcitonin, salmon, in man, renal effects on, 200
Calcium and magnesium excretion during acute rise in glomerular filtration rate, 654
Carbon rod atomizer, microdetermination of blood lead in children by flameless atomic absorption, 567
Carotid body in vascular, respiratory, and other diseases, catecholamines and 5-hydroxytryptamine in, 63
Cartilage matrix, segregated antigen in, 364
Catecholamines and 5-hydroxytryptamine in the carotid body in vascular, respiratory, and other diseases, 63
Cells, acid-hydrolyzed, an absorption method for preparing anti-M-typing streptococcal sera, 834
Chlordiazepoxide, secobarbital, glutethimidine, and meprobamate, effect of saline infusion on the renal excretion of, 56
Chromatography, column, inexpensive apparatus for making precise, continuous complex gradients for, 839
Copper, effect of, on erythrocyte hexose monophosphate shunt pathway, 405
Counterimmunoelectrophoresis, diagnosis of bacterial meningitis by, 449
C-reactive protein, dog, and C-reactive protein response in dog, further observations on properties of, 698
Creatine phosphokinase MB isoenzyme, combined isoenzyme analysis in diagnosis of myocardial injury, application of electrophoretic methods for detection and quantitation of, 577
Cyclophosphamide, effects of on lymphocytes, mechanisms of immunosuppression, 506
Cystic fibrosis, depressed plasma retinol-binding protein levels in, 423

D

Dehydrogenase, glucose-6-phosphatase, stabilizing factors in X-linked chronic granulomatous disease, altered levels of, 644
Diabetes mellitus, increased platelet aggregation in, 236
Diaminodiphenylsulfone, effect of methylene blue and, on red cell reduced glutathione synthesis, 481
Diaphragm, rat, role of bicarbonate in determining pH heterogeneity in, 679
Diarrhea, chronic, tissue magnesium level in, 313
  human, net and unidirectional transmucosal flux of sodium and water in acute, 686
Diets, solid, sterol balance studies in patients on, comparison of two nonabsorbable markers, 530
Digoxin and other sterol-like compounds using Somogyi precipitation, improved radioimmunoassay of, 748
DNA and RNA, simple fluorometric method for determination of, in tissues, 598
Dog C-reactive protein and C-reactive protein response in dog, further observations on properties of, 698
2,3-DPG and viability in bicarbonate-containing medium, the effect of blood bag permeability, preservation of red cell, 723

E

Edema, hereditary angioneurotic, inhibitory properties of plasma against activated plasma thromboplastin antecedent (factor XIa) in, 803
Editor's preface, 464
Elastase, leukocytic from purulent sputum by alpha-1-antitrypsin, inhibition of, 88
Electrophoresis, crossover, electrosyneresis, visualization of the abnormal factor X (factor X Friuli), 740
Endotoxin shock, renal response to saline infusion in, 665
Erythrocyte hexose monophosphate shunt pathway, effect of copper on, 405
Erythropoiesis, effect of aldosterone on erythropoietin production and, 217
Erythropoietin production and erythropoiesis, effect of aldosterone on, 217
Estradiol, anti-inflammatory effects of, on human blood leukocytes, 373
Ethanol, effects of, on endogenous lipid and lipoprotein metabolism in small intestines, 34

F

Factor VIII, immunologic studies of antihemophilic factor, 822
  X (factor X Friuli), abnormal, crossover electrophoresis, electrosyneresis, visualization of, 740
  XI, partial purification and some properties of plasma inhibitor of activated plasma thromboplastin antecedent, 786
  XIa in hereditary angioneurotic edema, inhibitory properties of plasma against activated plasma thromboplastin antecedent, 803
Fatty acid synthesis in human platelets, effect of glucose feeding on, 231
α-Feto-protein, rivanol precipitation technique for detection of, 125
Fibroblasts from a family with Wolman's disease and their apparent correction in vitro, lipid accumulation and lipase deficiency in, 810
Folate, human, and vitamin B_{12} deficiency, oxidation of beta carbon of serine in, 395

G

Gaucher spleen, quantity and fatty acyl composition of glycosphingolipids of, 523

Glass-bead columns, ADP as a cause of reversible inhibition of platelet retention in, 603
γ-Globulin binding of morphine in heroin addicts, 155
Glomerular filtration rate, calcium and magnesium excretion during acute rise in, 654
in small animals without urine collection, measurement of, 845
Glucose, effect of, on platelet response to release-inducing stimuli, 247
feeding, effect of, on fatty acid synthesis in human platelets, 231
Glucose-6-phosphatase dehydrogenase stabilizing factors in X-linked chronic granulomatous disease, altered levels of, 644
Glutamine aminotransferase-ω-amidase pathway in human kidney in vitro, studies on, 581
Glutathione synthesis, reduced, effect of methylene blue and diaminodiphenylsulfone on red cell, 481
Glutethimidine, secobarbital, meprobamate, and chlordiazepoxide, effect of saline infusion on the renal excretion of, 56
Glycosidases in fresh and stored human platelets, studies of, 635
Glycosphingolipids of Gaucher spleen, quantity and fatty acyl composition of, 523
Gradients, continuous complex, inexpensive apparatus for making precise, for column chromatography, 839
Granulomatous disease, X-linked chronic, altered levels of glucose-6-phosphatase dehydrogenase stabilizing factors in, 644

H

Hageman factor (factor XII) and plasma thromboplastin antecedent (factor XI), studies on the product of the reaction between activated, 704
Hemoglobin, sickle, and desickling agents, evaluation of, by falling ball viscometry, 282
uptake of, by hepatic parenchymal cells, storage iron kinetics, 624
Hemolysis, cardiac, valuable screening test for assessing severity of, plasma hemopexin levels following aortic valve replacement, 112
compensated, in hereditary spherocytosis, oxygen affinity and, 780
Hemopexin, plasma, homeostasis during acute phase response, 18
levels following aortic valve replacement, valuable screening test for assessing the severity of cardiac hemolysis, 112
rabbit, free and heme-bound, immunological differentiation of, 817
Heparinic acid complexes, intestinal absorption of stable, 47
Heroin addicts, γ-globulin binding of morphine in, 155
Hexose monophosphate shunt, erythrocyte, effect of copper on, 405
Homeostasis, plasma hemopexin, during acute phase response, 18
Homogenate, ileal, tryptic inhibition of vitamin B_{12} uptake by, method for the quantitation of alpha-1-antitrypsin in serum, 102
5-Hydroxytryptamine, catecholamines, in the carotid body in vascular, respiratory, and other diseases, 63
Hypercalciuria, spironolactone-induced, 224
Hypertension, human, definition and use of renin reaction velocity in study of, 342
renal, renal weight and content of lipids and phospholipid renin preinhibitor in rats with, 755
sodium balance during the development of experimental, 539

I

IgA determinants on B-lymphocytes in patients with deficiency of circulating IgA, 26
Immunoglobulin, $F(ab')_2$-like fragments in urines from patients with systemic lupus erythematosus, 514
Immunosuppression, mechanisms of, effects of cyclophosphamide on lymphocytes, 506
Infusion, saline, effect of, on renal excretion of secobarbital, glutethimidine, meprobamate, and chlordiazepoxide, 56
Intestines, small, effects of ethanol on endogenous lipid and lipoprotein metabolism in, 34
Iron absorption, control, role of transferrin in, studies on a cellular level, 333
carrier, mucosal, search for, identification of mucosal fractions with rapid turnover of Fe^{59}, 322
kinetics, storage, measurement of cellular distribution of ^{59}Fe in rat liver, 613
Iron kinetics, storage, uptake of hemoglobin by hepatic parenchymal cells, 624

K

Kallikrein, kinetics of release of bradykinin by, in normal human plasma, 496
Kernicterus, sephadex G-25 quantitative estimation of free bilirubin potential in jaundiced newborn infants' sera, guide to prevention of, 455
Kidney, human, in vitro, studies on glutamine aminotransferase-ω-amidase pathway in, 581
Kinetics, iron storage, uptake of hemoglobin by hepatic parenchymal cells, 624
storage iron, measurement of cellular distribution of ^{59}Fe in rat liver, 613
studies, tumor cell, in vivo, use of local thymidine injection followed by fine needle aspiration, 297

L

Leukocytes, human blood, anti-inflammatory effects of estradiol on, 373
polymorphonuclear, motility in vitro, effect of purine and pyrimidine analogues, possible role of cyclic AMP, 264
Lipase deficiency and lipid accumulation in fibroblasts from a family with Wolman's disease and their apparent correction in vitro, 810
Lipid accumulation and lipase deficiency in fibroblasts from a family with Wolman's disease and their apparent correction in vitro, 810
and phospholipid renin preinhibitor in rats with renal hypertension, renal weight and content of, 755
endogenous, and lipoprotein metabolism in small intestines, effects of ethanol on, 34
Lipoprotein, lipid, metabolism in small intestines, effects of ethanol on endogenous, 34
Liver, rat, storage iron kinetics, measurement of cellular distribution of ^{59}Fe in, 613
Lupus erythematosus, systemic, $F(ab')_2$-like immunoglobulin fragments in urines from patients with, 514
B-Lymphocytes in patients with deficiency of circulating IgA, IgA determinants on, 26
mechanisms of immunosuppression, effects of cyclophosphamide on, 506
transformation with streptolysin S preparations and inhibition of streptolysin S by serum in rheumatic fever and other rheumatic diseases, 165

M

Macroamylase complexes, study of, 414
Magnesium and calcium excretion during acute rise on glomerular filtration rate, 654
Magnesium, tissue, level in chronic diarrhea, 313
Man, renal effects on salmon calcitonin in, 200
Matrix, cartilage, segregated antigen in, 364
Medullary aplasia, experimental, 8
Meningitis, bacterial, diagnosis of by counterimmunoelectrophoresis, 449
Meprobamate, secobarbital, glutethimidine, and chlordiazepoxide, effect of saline infusion on the renal excretion of, 56
Metabolism, interrelationship of, and pH heterogeneity in muscle cells, 351
lipid and lipoprotein, endogenous, in small intestines, effects of ethanol on, 34
Methylene blue and diaminodiphenylsulfone, effect of on red cell reduced glutathione synthesis, 481
Methylprednisolone on renal function, effects of a large dose of, 765
Molecules, small, use of thyroglobulin to induce antigenicity to, 134
Monophosphate shunt, erythrocyte hexose, effect of copper on, 405
Morphine in heroin addicts, γ-globulin binding of, 155
Mucosal fractions, identification of with rapid turnover of Fe^{59}, search for mucosal iron carrier, 322
Muscle cells, interrelationship of metabolism and pH heterogeneity in, 351
Myocardial injury, combined isoenzyme analysis in diagnosis of, application of electrophoretic methods for detection and quantitation of creatine phosphokinase MB isoenzyme, 577

N

Nasal secretions in normal subjects, quantitative composition of, 275
Needle aspiration, fine, in vivo tumor cell kinetic studies, use of local thymidine injection followed by, 297
Neuroblastoma and human adrenal gland, tyrosine hydroxylase activity in, 190

O

Oxygen affinity and compensated hemolysis in hereditary spherocytosis, 780
Ozone interaction with rodent lung, effect on sulfhydryls and sulfhydryl-containing enzyme activities, 559

P

Pancreas, internal secretion of the, 465
Parenchymal cells, hepatic, storage iron kinetics, uptake of hemoglobin by, 724
Phagocytosis-stimulated nitroblue tetrazolium reaction by platelets, 117
Phase response, acute, plasma hemopexin homeostasis during, 18
Phenobarbital, effect of, on small intestinal structure and function in rat, 548
Phospholipid renin preinhibitor in rats with renal hypertension, renal weight and content of lipids and, 755
Plasma and tissues, microfluorometric enzymatic assay for determination of alanine and pyruvate in, 434
Plasma hemopexin homeostasis during the acute phase response, 18
levels following aortic valve replacement, valuable screening test for assessing the severity of cardiac hemolysis, 112
inhibitor of activated plasma thromboplastin antecedent (factor XI), partial purification and some properties of, 786
inhibitory properties of, against activated plasma thromboplastin antecedent (factor XIa) in hereditary angioneurotic edema, 803

Plasma—Cont'd
normal human, kinetics of release of bradykinin by kallikrein in, 496
retinol-binding protein levels in cystic fibrosis, depressed, 423
thromboplastin antecedent (factor XI), studies on product of reaction between activated Hageman factor (factor XII) and, 704
Platelet aggregation, increased, in diabetes mellitus, 236
function tests, correlation with hemorrhagic and thrombotic complications, classification of thrombocytosis based on, 385
human, stored, studies of glycosidases in fresh and, 635
effect of glucose feeding on fatty acid synthesis in, 231
phagocytosis-stimulated nitroblue tetrazolium reaction by, 117
response to release-inducing stimuli, effect of glucose on, 247
retention in glass-bead columns, ADP as cause of reversible inhibition of, 603
Pneumoencephalography, changes in antihemophilic factor (AHF, factor VIII) procoagulant activity, and AHF-like antigen in normal pregnancy following exercise and, 256
Presidential address, 1
Procoagulant activity, and AHF-like antigen in normal pregnancy following exercise and pneumoencephalography, changes in antihemophilic factor (AHF, factor VIII), 256
Protein-binding assays, competitive, including radioimmunoassays, a generalized computer program for the treatment of data from, 302
levels in cystic fibrosis, depressed plasma retinol-binding, 423
Purine, effect of, and pyrimidine analogues, possible role of cyclic AMO, polymorphonuclear leukocyte motility in vitro, 264
Pyrimidine, effect of purine and, analogues, possible role of cyclic AMP, polymorphonuclear leukocyte motility in vitro, 264
Pyruvate and alanine in plasma and tissues, microfluorometric enzymatic assay for determination of, 434

R

Rabbit, effect of rubella vaccine on transplacental rubella virus injection in, 179
hemopexin, free and heme-bound immunological differentiation of, 817
Radioimmunoassays, a generalized computer program for the treatment of data from competitive protein-binding assays including, 302
Radioimmunoassay, improved, digoxin and other sterol-like compounds using Somogyi precipitation, 748
triiodothyronine in serum, its application to clinical and physiological studies, 729
Rat diaphragm, role of bicarbonate in determining pH heterogeneity in, 679
effect of phenobarbital on small intestinal structure and function in, 548
liver, storage iron kinetics, measurement of cellular distribution of ^{59}Fe in, 613
uremic, inhibition of brain sodium-potassium ATPase in, 71
with renal hypertension, renal weight and content of lipids and phospholipid renin preinhibitor in, 755
Red cell 2,3-DPG and viability in bicarbonate containing medium, effect of blood bag permeability, preservation of, 723
Renal function, effects of a large dose of methylprednisolone on, 765
Renin, lipids and phospholipid, preinhibitor in rats with renal hypertension, renal weight and content of, 755
reaction, definition and use of velocity in study of human hypertension, 342
Rheumatic fever and other rheumatic diseases, lymphocyte transformation with streptolysin S preparations and inhibition of streptolysin S by serum in, 165
Rivanol precipitation technique for detection of alpha-feto-protein, 125
RNA and DNA, simple fluorometric method for determination of, in tissues, 598
Rodent lung, ozone interaction with effect on sulfhydryls and sulfhydryl-containing enzyme activities, 559
Rubella vaccine, effect of, on transplacental rubella virus injection in rabbits, 179

S

Saline infusion, effect of, on the renal excretion of secobarbital, glutethimidine, meprobamate, and chlordiazepoxide, 56
in endotoxin shock, renal response to, 665
Salmon calcitonin in man, renal effects on, 200
Secobarbital, glutethimidine, meprobamate, and chlordiazepoxide, effect of saline infusion on the renal excretion of, 56
Secretions, nasal, quantitative composition of, in normal subjects, 275
Selenium, serum, determination of, by means of solvent extraction combined with activation analysis, 718
Sephadex G-25 quantitative estimation of free bilirubin potential in jaundiced newborn infants' sera, guide to prevention of kernicterus, 455

Sera, jaundiced newborn infants', sephadex G-25 quantitative estimation of free, bilirubin potential in, guide to prevention of kernicterus, 455
Serine in human folate and vitamin B_{12} deficiency, oxidation of beta carbon of, 395
Serum, its application to clinical and physiological studies, improved radioimmunoassay of triiodothyronine in, 729
selenium, determination of, by means of solvent extraction combined with activation analysis, 718
tryptic inhibition of vitamin B_{12} uptake by ileal homogenate, method for the quantitation of alpha-1-antitrypsin in, 102
Shock, endotoxin, renal response to saline infusion in, 665
Sickle hemoglobin, evaluation of, and desickling agents by falling ball viscometry, 282
Smoking and non-smoking in middle-aged business executives, exercise responses of, 79
Sodium balance during the development of experimental hypertension, 539
measurement of nonexchangeable, in normal man, 442
water, in acute human diarrhea, net and unidirectional transmucosal flux of, 686
Somogyi precipitation, improved radioimmunoassay of digoxin and other sterol-like compounds using, 748
Spherocytosis, hereditary, oxygen affinity and compensated hemolysis in, 780
Spironolactone-induced hypercalciuria, 224
Spleen, Gaucher, quantity and fatty acyl composition of glycosphingolipids of, 523
Sputum, purulent, inhibition of leukocytic elastase from, by alpha-1-antitrypsin, 88
Staphylococcus aureus, whole blood phagocytic and bactericidal activity for, 857
Sterol balance studies in patients on solid diets, comparison of two nonabsorbable markers, 530
Streptococcal sera, an absorption method for preparing anti-M-typing, using acid-hydrolyzed cells, 834
Streptolysin S preparations, lymphocyte transformation with, and inhibition of streptolysin S by serum in rheumatic fever and other rheumatic diseases, 165
Sulfhydryls and sulfhydryl-containing enzyme activities, ozone interaction with rodent lung, effect on, 559

T

Tartrate-resistant acid phosphatase activity in human blood cells, semiquantitative evaluation of, 711
Tetrazolium nitroblue, phagocytosis-stimulated, reaction by platelets, 117
Thrombocytosis, classification of, based on platelet function tests, correlation with hemorrhagic and thrombotic complications, 385
Thromboplastin antecedent, plasma (factor XIa) in hereditary angioneurotic edema, inhibitory properties of plasma against activated, 803
plasma, antecedent (factor XI) partial purification and some properties of plasma inhibitor of activated, 786
Thymidine injection, use of local, followed by fine needle aspiration, in vivo tumor cell kinetic studies, 297
Thyroglobulin, use of, to induce antigenicity to small molecules, 134
Thyroxine, serum-free, concentration by ultrafiltration, estimation of, 145
Tissue magnesium level in chronic diarrhea, 313
Tissues and plasma, microfluorometric enzymatic assay for determination of alanine and pyruvate in, 434
Transcobalamin II, late transport of vitamin B_{12} by, 488
Transferrin, role of, in control of iron absorption, studies on cellular level, 333
Transmucosal flux, net and unidirectional, of sodium and water in acute human diarrhea, 686
Triiodothyronine, improved radioimmunoassay of, in serum, its application to clinical and physiological studies, 729
Tumor cell, in vivo, kinetic studies, use of local thymidine injection followed by fine needle aspiration, 297
Tyrosine hydroxylase activity in neuroblastoma and human adrenal gland, 190

U

Ultrafiltration, estimation of serum-free thyroxine concentration by, 145
Urine collection, measurement of glomerular filtration rate in small animals without, 845

V

Vaccine, rubella, effect of, on transplacental rubella virus injection in rabbits, 179
Viscometry, falling ball, evaluation of sickle hemoglobin and desickling agents by, 282
Vitamin B_{12} deficiency, oxidation of beta carbon of serine in human folate and, 395
late transport of by transcobalamin II, 488
uptake by ileal homogenate, tryptic inhibition of, method for the quantitation of alpha-1-antitrypsin in serum, 102

W

Water and sodium in acute human diarrhea, net and unidirectional transmucosal flux of, 686

Wolman's disease, lipid accumulation and lipase deficiency in fibroblasts from a family with, and their apparent correction in vitro, 810
